

# NEW VOLCANO CASES

## Now Available

Travel and Safety Case for the Volcano Vaporizer

The new Volcano Case has a more heat resistant interior, better padding, sturdier construction, and new lower prices!

More than ever customers need the Volcano Case because now the Volcano and the parts come in two separate boxes. The Volcano Case provides protection for the Volcano parts and the Volcano, and it keeps everything together.

The extra large internal capacity provides plenty of room for the Volcano and accessories. You can fit both styles of valve sets, the base unit, and an inverter, plus supplies in this extra large capacity case.

The Volcano Case is light weight but strong *aluminum* and it locks so it provides superior protection for the Volcano. It helps prevent unauthorized use, as well as protects the Volcano against damage from accidental drops.

Offer the Volcano Case with every Volcano purchased!
